Q

What is lipoLIGHT?

**NON-INVASIVE FAT
REDUCTION**

LIPO LIGHT

A combination of red and infrared lights are placed over the skin of your targeted area effectively liquifying fat tissue underneath. The liquified fat is then eliminated either through the lymphatic system or burned off as energy.

NEXT 

DOES IT HURT?

Not at all! lipoLIGHT is completely pain free and requires absolutely no downtime.

NEXT 

WHEN WILL I SEE RESULTS?

Most clients experience some inch loss immediately. However, lasting results are typically achieved after 6-8 sessions.

For optimum results combine with
CAVITATION.

NEXT 

HOW LONG DO RESULTS LAST?

Results can be permanent when followed by healthy diet and lifestyle.

NEXT 

AM I A CANDIDATE?

lipoLIGHT is NOT recommended for those with:

- pacemaker/heart condition
- pregnant or nursing
- diabetes or cancer
- high blood pressure or cholesterol
- kidney or liver conditions
- on menstrual cycle

NEXT 

WHAT IS THE AFTER CARE?

Immediately after treatment it is important that you flush the lymphatic system and create a demand for the released fat. This will ensure that it isn't stored elsewhere later.

- 30 minute workout or sauna session is ideal.
- drink plenty of water and avoid alcohol 48 hrs before and after treatment
